EDUCATION

SMK Wikrama Bogor, Bogor Jun 2022 – Jun 2025
Software and Game Development Major

WORKING EXPERIENCE

PT Industri Kreatif Digital, Bogor Jan 2024 – Jun 2024
Intern Web Developer

- Developed and maintained web applications using the Laravel framework.
- Gained hands-on experience with backend and frontend development, including database management.
- Built **Legalisasi App**, a system for managing Cooperation Agreements (SPK) and handling server service orders.
- Created **Guest Book Data Center**, a check-in & check-out system for recording guest visits to the data center.
- Deployed applications to a Virtual Private Server (VPS) and managed production environments.
- Implemented scheduled tasks using **Laravel Scheduler** and configured **cron jobs** on the server.
- Managed **domain and subdomain configurations**, including DNS setup and web server (Apache) management.

PROJECTS

Qiwanime – Anime Collection & Comment Web App Apr 2025 – May 2025
Web Developer

Tech Stack: Next.js, Tailwind CSS, Prisma ORM, MySQL, REST API

- Developed a web app for personal anime collection management and user comment system.
- Implemented GitHub authentication and integrated Jikan API for real-time data.
- Designed CRUD features for collections and comments with proper data validation and sorting.
- Built relational database schema with Prisma and MySQL to ensure data integrity.

Cashier App Apr 2025
Web Developer

Tech Stack: Laravel, Bootstrap, PHP, MySQL

- Developed a cashier and admin system for a retail store
- Admins can add products and view sales analytics with graphical reports using Larapex.
- Cashiers/employees can track daily sold products and create orders efficiently.
- Implemented a points system to reward customers based on purchases.

EKSIS (Eskul Senbud) Website Jul 2024 – Jan 2025
Web Developer & UI Designer

Tech Stack: React, Tailwind CSS, Laravel, PostgreSQL, Inertia.js

- Developed a student extracurricular management platform featuring attendance tracking, activity logs, and achievement records.
- Collaborated with backend developers to integrate and consume RESTful APIs using Inertia.js.
- Designed a responsive and user-friendly interface with Tailwind CSS and React.
- Implemented authentication and routing using Laravel Breeze for a seamless SPA experience.

Unity Essential

Aug 2024 – Sep 2024

Unity Developer

Tech Stack: Unity, C#

- Created fundamental game mechanics and interactions including object control, animation, and scene navigation in Unity.
- Deployed the project using Unity WebGL to make it publicly accessible via web browser.

Guest Book App – PT Industri Kreatif Digital

May 2024 – Jun 2024

Web Developer

Tech Stack: Laravel, PHP, MySQL, Bootstrap, JQuery, Javascript

- Developed a guest book system for tracking check-in and check-out of visitors at the data center.
- Built a simple and efficient interface to log visitor details and manage daily records.

Legalization App – PT Industri Kreatif Digital

Jan 2024 – May 2024

Web Developer

Tech Stack: Laravel, PHP, MySQL

- Built a document legalization system with secure authentication and user role management..
- Implemented request tracking, SPK (Surat Perjanjian Kerja Sama) integration, and server service order management through an admin dashboard.
